Non-curricular factors have a negative impact on overall student and institutional success.
Student Wellness Issues are Connected

Substance abuse is as predictive of student GPA as time spent studying\(^1\)

High-risk drinkers are 8 times more likely to commit sexual assault as low-risk drinkers\(^3\)

More than 50% of students paid a bill late in the last year\(^2\)

70% of students polled said their colleges should increase financial education programs\(^4\)

EverFi Wellness and Prevention Framework

Establish Foundation
EverFi's evidence-based courses and data collection

Analyze Survey Data
Baseline insights and opportunities to further prevention

Refine Campus Programs & Policies
EverFi Research and Coalition provide actionable insights to inform campus programming

Evaluate Outcomes
National insights and campus data inform areas of focus for following year's implementation

POPULATION-LEVEL WELLNESS
Evidence-based framework
- Positive message framing and inclusive language
- Interactive and realistic skill-building scenarios

Comprehensive content
- Helps meet Title IX and Campus SaVE Act mandates
- Foundational education on key topics including:
  -- Healthy relationships, communication, and consent
  -- Sexual assault, relationship violence, and stalking
  -- Risk awareness and reduction strategies
  -- Bystander intervention and social norms
  -- Campus policies and support resources

Rich data reports to enhance ongoing programming

College students
Legislative mandates

National Insights On Sexual Assault in Higher Education
National Insights from the EverFi Network

Your results should be viewed in a broader, shifting national context. Here are some highlighted insights from EverFi’s vast student survey respondents.

18% of females report experiencing some form of abuse in a romantic relationship

16% have experienced some form of harassment

14% have experienced sexual assault

and yet, less than 25% of our sample believe that sexual violence is a significant problem on their campus.

70% of undergraduates would feel comfortable taking action if they saw someone trying to take advantage of another person

but only 50% think most students would do the same.
The College Effect

In aggregate, we anticipate students’ sexual assault attitudes and behaviors to worsen upon arrival to college.

The “College Effect.” Research shows that the first few weeks of college pose the highest risk across a variety of behaviors, and the transition to college can be particularly detrimental to a subset of students.
Understanding the Patterns of Distinct Groups

Most college students have healthy attitudes and behaviors when it comes to relationships. *Haven* helps reinforce them.

**Healthy Majority**
- Healthier SA responses
- Primarily female
- More likely to abstain from alcohol and drugs
- Less likely to drink underage and get drunk underage

**Unhealthy Minority**
- Wide variety of SA responses
- Primarily Male
- MUCH more likely to experience negative consequences from drinking
- More likely to report sexually assaulting another person
- More likely to be athletes and Greek members

These findings are consistent with research literature and should inform prevention efforts with students.

</table>

Percentage of students with healthy/positive responses as indicated by the “moderately – strongly agree” or “moderately – strongly disagree” label for each item.
Bystander Intervention and Social Norms

Students are asked about their likelihood and comfort in intervening to prevent sexual and relationship violence, and respect for others who intervene. They are also asked how they think most students on their campus would respond.

These responses form the basis of a social norms approach to overcome student barriers to bystander action by aligning student perceptions of the norm to actual campus norms.

Bystander Intervention Social Norms (Post-course Responses)

- Willingness to intervene: 47% (perceived norm), 71% (actual norm)
- Respect for someone who intervened: 71% (perceived norm), 80% (actual norm)
- Comfort intervening when witnessing abusive behavior: 43% (perceived norm), 63% (actual norm)
Best Practice Recommendations
### 2014 Best Practice Recommendations

<table>
<thead>
<tr>
<th>Prevention Education</th>
<th>Perpetration</th>
<th>Victimization</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Co-curricular education on alcohol and sexual assault</strong></td>
<td><strong>Social norms and bystander intervention programming</strong></td>
<td><strong>Victim-sensitive risk reduction education</strong></td>
</tr>
</tbody>
</table>
| Prevention programs should teach bystanders how to recognize how alcohol is used to incapacitate victims, provide alcohol risk-reduction strategies for potential victims, and educate all students how alcohol plays a role in sexual assault:  
  - **Alcohol as a tool**: perpetrators use alcohol to increase vulnerability in potential victims  
  - **Stereotypes**: sexually aggressive men may target drinking women as more sexually available  
  - **Alcohol myopia**: alcohol affects perceptions and cognition, limiting ability to read social cues | According to the research literature:  
  - Norms—particularly perceptions of norms and the extent of acceptability of unhealthy behaviors and attitudes—are critical in influencing perpetrator (and bystander) behavior  
  - The vast majority of students (both male and female) exhibit positive/healthy attitudes and behaviors  
  - Students typically dramatically underestimate the degree of healthy attitudes and behaviors among their peers  
  - Correcting normative misperceptions can help students overcome barriers to intervention | It is critically important to express how all students can keep themselves safer without making victims feel they are to blame for being sexually assaulted. To that end, victim-sensitive risk-reduction education should:  
  - Take into consideration that participants will likely include sexual assault survivors  
  - Repeatedly stress that sexual assault is never the victim’s fault  
  - Recognize that risk-reduction education is not primary prevention and must take place in the larger context of holding perpetrators accountable |
Conclusion: *Haven* as a Foundation

For Administrators and Prevention Practitioners:

**Population-Level Prevention**

Haven provides a foundation of awareness, knowledge, and skills related to the critical issues of sexual assault, relationship violence, and stalking.

For Students (Optimally Prematriculation):

**On-Going Prevention Efforts**

This summary provides key research findings and campus-based data insights to guide the design and delivery of effective prevention programs, policies, and procedures.

Don’t hesitate to reach out to your Partner Services Director at EverFi for ways we can assist with on-going prevention.

Pre- and Post-course Assessment Questions

Stalking can be best defined as:
A. Going on someone’s Facebook page multiple times
B. A strong desire to connect with someone that persists for a while
C. Repeated, unwanted behavior directed at a specific person that may cause fear
D. Getting in touch with someone in multiple ways (phone, email, text, etc.)

Which of the following is not a factor that contributes to sexual assault:
A. Bystander intervention
B. Sexist language
C. Rigid gender roles
D. Media portrayals of sexuality

The best way to get consent in sexual situations is:
A. Relying on non-verbal communication or body language
B. Trying something and seeing how your partner reacts
C. Asking repeatedly until your partner agrees to do something
D. Clear verbal communication about what each partner wants

Perpetrators of sexual assault are most often:
A. People who got too drunk to remember what happened
B. Someone who is known by the victim
C. Strangers who often have weapons and use force
D. People who have criminal backgrounds

What drug is most commonly used to incapacitate people into having non-consensual sexual experiences?
A. Roofies
B. Ketamine
C. Alcohol
D. GHB

% of women experience sexual assault while in college.
A. 5-10%
B. 20-25%
C. 30-40%
D. 70-80%

Which of the following is the best way to respond if a friend tells you they were sexually assaulted?
A. Listen to them, believe them, and support their decisions
B. Make them go to the hospital and/or police department
C. Ask them questions to find out more about what happened
D. Tell your friends so they all are aware

Why is alcohol used so often by perpetrator’s to commit sexual assault?
A. Alcohol inhibits motor control, making it difficult to resist or leave in a potentially dangerous situation.
B. Alcohol affects communication skills and judgment, making it hard to interpret warning signs, make safe decisions, and get or give consent.
C. Alcohol is not often used by perpetrators on campus
D. Both A and B

If you are concerned that a person may be in danger of committing or falling victim to sexual assault, you can:
A. Express your concern to them directly
B. Cause a distraction to draw them away from the situation (e.g. spill a drink, tell them their car is getting towed, ask them to come do something with you)
C. Talk to friends or peers nearby to figure out what to do
D. All of the above

Campuses have a judicial system that sexual assault victims can utilize whether or not they choose to file a police report.
A. True
B. False

***Correct Answer
